Subject: No storage

Part of Records Package / Supplement / Correction

No storage of nuclear waste at Yucca Mountain or any other place in Nevada. Without the ability to dispose of nuclear waste safely, there should be a halt to the use of nuclear power, and a concentration on non-lethal forms of energy, i.e. solar, wind, etc. Make the discovery of the ability to make hydrogen a stable form of energy a national priority, and present the world with the precious gift of clean, abundant power. If anyone can do it, it's America!
